SAFETY DATA SHEET

Section 1 - Chemical Product and Company Information

Akron Paint and Varnish
(db a APV Engineered Coatings)
1390 Firestone Parkway
Akron, Ohio 44301 USA

Product Name: BLACK TIRE PAINT CONCENTRATE
Product Use: Paint
Not recommended for: Contact with food

Product Code: P-9413-01

Section 2 - Hazards Identification

GHS Ratings
Reproductive toxin 1B Presumed, Based on experimental animals

GHS Hazards
H360 May damage fertility or the unborn child.

GHS Precautions
P201 Obtain special instructions before use
P202 Do not handle until all safety precautions have been read and understood
P281 Use personal protective equipment as required
P308+P313 IF exposed or concerned: Get medical advice/attention.
P405 Store locked up
P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

Signal Word: Danger

Acute Toxicity
N/A

Conditions Aggravated
N/A

Chronic Effects
N/A

Section 3 - Composition / Information on Ingredients

</tr>
<tr>
<td>Butyl benzyl phthalate</td>
<td>85-68-7</td>
<td>0.70%</td>
</tr>
</tbody>
</table>

Section 4 - First Aid Measures
INHALATION - Move affected person to fresh air, rest in a half upright position, and loosen clothing. If breathing is difficult, administer oxygen. If breathing has stopped, give artificial respiration. Seek medical advice after significant exposure.

EYE CONTACT - Flush with large amounts of water for at least 15 minutes. Lift eyelids occasionally. Get prompt medical attention.

SKIN - Wash thoroughly with soap and water immediately. Remove all contaminated clothing immediately. Seek medical advice if irritation persists.

INGESTION - Seek medical advice. The decision to induce vomiting or not must be made by a physician after careful consideration of all materials ingested. Risk of aspiration into lungs.

Section 5 - Fire Fighting Measures

Suitable Extinguishing Media
Carbon Dioxide---Dry Chemical---Foam---Water Fog
Use water for cooling material stored in vicinity of fire.

Explosion Hazards
Vapors are heavier than air and may travel along the ground to an ignition source some distance from material handling point. Ignition sources include pilot lights, smoking, heaters, electric motors, sparks from electrical switches and static discharges.

CAUTION: Never use cutting torch on empty containers! Residual solvent vapor in empty container may explode. Application to hot surfaces requires special precautions. During emergency conditions, overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain Medical Attention.

Hazardous Combustion Products
N/A

Recommended Fire Equipment
Use self-contained breathing apparatus with a full-face piece operated in a pressure-demand or other positive pressure mode. Wear protective clothing.

Section 6 - Accidental Release Measures

Non-emergency personnel: Evacuate and isolate the area and prevent access. Remove ignition sources. No flares, smoking or flames in hazard area. Notify management. Avoid breathing vapor or mist and put on protective equipment. Control source of the leak. Ventilate.

Emergency responders: See section 8 for any specialized clothing recommendations. Also reference the information for non-emergency personnel

Environmental precautions: Prevent further leakage or spillage if possible. Do not allow the material to spread to drains, sewers, water supplies, or soil. Contact APV (330-773-8911) for assistance and advice.

Small Spill: Stop leak if possible and move containers from the spill area. Water soluble: dilute with water and mop up. Water Insoluble: Cover spill area with a suitable absorbent inert material (Kitty Litter, Oil-Dri, etc.) and dispose of in an appropriate metal waste container. Dispose of material through a licensed waste disposal contractor.

SDS for: P-9413-01
Printed: 10/25/2018 at 9:03:03AM
**Large Spill:** Stop leak if possible and move containers from the spill area. Approach release from upwind. Contain spillage and with non-combustible absorbent material and place in appropriate disposal container according to local regulations. Dispose of material through a licensed waste disposal contractor. Report spill to appropriate governing agencies if applicable.

APV requires that CHEMTREC be immediately notified (800-424-9300) when this product is unintentionally released from its container during its course of distribution, regardless of the amount released. Distribution includes transportation, storage incidental to transportation, loading and unloading. Such notification must be immediate and made by the person have knowledge of the release.

---

### Section 7 - Handling and Storage

**Precautions for Safe Handling**

Keep away from food, drink and heat. Keep away from sources of ignition. No smoking. Do not breathe vapor. Avoid contact with skin and eyes. Never use pressure to empty. Take precautionary measures against static discharges.

**Storage temperature**

- **Minimum:** do not freeze
- **Maximum:** 40°C (104°F)

**Storage Period:** See technical data sheet.

---

### Section 8 - Exposure Controls / Personal Protection

<table>

<td>Not Established</td>
</tr>
</tbody>
</table>

**Engineering Controls:** Use only with adequate ventilation. Use process enclosures, local exhaust ventilation, or other controls to keep air containment concentration below current applicable OSHA permissible exposure limit or ACGIH TLV limit, and volatiles below lower explosive limit. Heavy solvent vapors should be removed from the lower levels of area, and all ignition sources (non-explosion proof equipment) should be eliminated if flammable mixtures will be encountered. Remove decomposition products formed during welding or flame cutting of surfaces coated with this product. For baking finishes - vent vapors emitted on heating.

**Environmental Controls:** Emissions should comply with environmental protection legislation.

**Individual Protection Measures:**

**Hygiene measures:** Wash hands, forearms, etc. after handling chemical products, before eating, smoking, and using the lavatory, and the end of the work period. Use appropriate techniques when removing potentially contaminated
clothing and wash before reusing. Know the locations of eyewash and safety showers.

**Respiratory Protection**- Provide adequate ventilation to keep exposure below permissible limits. If a risk assessment deems necessary, operator is to use a properly fitted, air purifying or supplied air respirator. Respirator selection must be based on known/anticipated exposure levels, the hazards of the product, and the safe working limits of the respirator.

**Skin and Body Protection**- Wear chemical resistant gloves (nitrile) and paint suits when necessary, based on risk assessment. The most suitable glove must be chosen in consultation with the gloves supplier who can inform about the breakthrough time of the glove material. PPE for the body should be selected based on the risks of the task being performed and approved by a specialist. Appropriate footwear should also be approved.

**Eye/Face Protection**- Wear approved chemical safety goggles where exposure to vapor or contact with eyes is possible. Eye wash stations should also be made available. If inhalation hazard exists, a risk assessment will determine if a full face respirator may be required.

---

### Section 10 - Stability and Reactivity

**Stability and reactivity profile**

This material is considered stable.

Hazardous polymerization will not occur.

**The following materials should be avoided in contact with the mixture**

- Oxidizing agents
- Hazardous decomposition products
  - Carbon oxides

---

### Section 11 - Toxicological Information

**Mixture Toxicity**

**Component Toxicity**

- 67-63-0 Isopropanol
- Dermal LD50: 4,059 mg/kg (Rabbit)
LC50 and LD50 toxicity for this product are merely estimates and have yet to be determined. For individual component ecotoxicity, please refer to Section 11.

**Possible Routes of Entry**
- Inhalation
- Skin Contact
- Eye Contact
- Ingestion

**Potential Target Organs**
- Eyes
- Lungs
- Central Nervous System
- Skin
- Respiratory System

**Effects of Overexposure**
- Not Available

**The following components are possible carcinogens**
- Materials labeled a carcinogen in dust form are supplied in solution, thus eliminating the hazard.

**Section 13 - Disposal Considerations**

Dispose of in accordance with federal, state and local regulations. Controlled incineration is recommended for disposal of unused product. Prevent contamination of soil, drains and surface waters. Dispose of large containers to a licensed reconditioner. Dispose of small containers in compliance with local regulations.

**Section 14 - Transport Information**
The following chemicals are listed in California Title 8 CCR Sections as Hazardous Substances:
- 67-63-0 Isopropanol
- 1333-86-4 Carbon Black
- 14807-96-6 Talc

The following chemicals are listed in California Title 8 CCR Sections 5200-5220 as Carcinogens:
- None

The following chemicals are listed in California Title 8 CCR Section 5203 as Carcinogens:
- None

The following chemicals are listed in California Title 8 CCR Section 5209 as Carcinogens:
- None

The following chemicals are listed in the EU-Substances of Very High Concern (2008/67/ED) (SVHC):
- None

The following chemicals are listed in the EU-Restriction of the use of certain Hazardous Substances (2011/65/EU) (RoHS):
- 85-68-7 Butyl benzyl phthalate

The following chemicals are included in the Global Automotive Declarable Substance List (GADSL):
- None

The following substances are required for notification by the Japanese Enforcement Order of the Industrial Safety and Health Law (ISHL):
- 64742-52-5 Distillates, petroleum, hydrotreated heavy naphthenic
- 67-63-0 Isopropanol
- 1333-86-4 Carbon Black

The following chemicals are listed on the Massachusetts Right-to-Know Hazardous Substances List:
- 67-63-0 Isopropanol
- 1333-86-4 Carbon Black
- 14807-96-6 Talc

The following chemicals are listed on the New Jersey Right-to-Know Hazardous Substances List:
- 67-63-0 Isopropanol
- 1333-86-4 Carbon Black
- 14807-96-6 Talc

The following chemicals are listed on the Pennsylvania Right-to-Know Hazardous Substances List:
- 67-63-0 Isopropanol
- 1333-86-4 Carbon Black
- 14807-96-6 Talc

The following chemicals are listed by the State of California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65):
- 85-68-7 Butyl benzyl phthalate  1 % Mutagen, Teratogen
- 1333-86-4 Carbon Black  1 to 5 % Carcinogen

Section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) requires certain facilities manufacturing, processing, or otherwise using listed toxic chemicals to report their environmental releases of such chemicals annually. The following chemicals are listed:
The following chemicals are listed in EPCRA (SARA) Section 313: Persistent, Bioaccumulative, and Toxic Chemicals (PBT)
- None

The following chemicals are listed under EPCRA (SARA) Section 313: Toxic Release Inventory (TRI)
- None

Under Section 12(b) of the Toxic Substances Control Act (TSCA), exporters may need to notify the U.S. Environmental Protection Agency if they export or intend to export a product containing a chemical substance that is present on this list. The following substances are contained within this material:
- None

The following chemicals are listed as a Hazardous Air Pollutant under listed under the U.S. CAA (Clean Air Act)
- None

Section 16 - Other Information

NFPA and HMIS use a numbering scale ranging from 0 to 4 to indicate the degree of hazard. A value of zero means that the substance possesses essentially no hazard; a rating of four indicates extreme danger. Although similar, the two rating systems are intended for different purposes, and use different criteria. The NFPA system was developed to provide an on-the-spot alert to the hazards of a material, and their severity, to emergency responders. The HMIS system was designed to communicate workplace hazard information to employees who handle hazardous chemicals.
