

## The Next Generation TPMS Service Tool

Choose from two TPMS service modes based on service type needed.  
The option to choose a TPMS diagnostic mode will decrease repair time.

### Quick Mode

- Activate all known sensors
- Read sensor ID, temperature and pressure
- Read battery power level condition

#### (3) Sensor programming options

- » 1. Copy by activation
- » 2. Copy by manual input
- » 3. Auto create 1-16 sensors

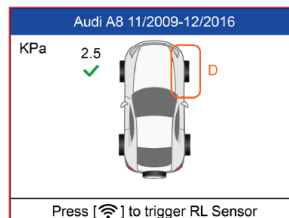

### Advanced Mode

- Activate all known sensors
- Read sensor ID, temperature, pressure & battery condition
- TPMS status screen – view system faults
- Read and clear DTC's from ECU
- On-tool relearn procedure
- Widest OBD relearn vehicle coverage
- Tire pressure placard value change

#### (4) Sensor programming options

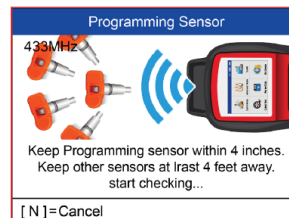

- » 1. Copy by activation
- » 2. Copy by manual input
- » 3. Auto create 1-16 sensors
- » 4. Copy by OBDII

### Diagnose

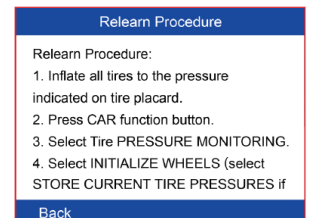

**1** Check all known TPMS sensors

### Replace

**2** Program AUTEL<sup>®</sup> MX-Sensor

### Confirm

**3** On-tool relearn procedure

Checks all known TPMS sensors

Program AUTEL<sup>®</sup> MX-Sensors

On-Tool relearn procedures

2.32" x 1.77" color screen

**Myers # 21602**

Includes: TS508 Tool, OBDII cord, charging cord, magnet, carry case, user manual, 1 year warranty, and free lifetime updates
