

A Complete TPMS, Diagnostic and Service Tool

Vehicle Service Functions

- Read and clear codes
- Relearn park brake pad
- Control and test ABS / SRS/EPB / DPF groups
- Diesel particulate filter service
- Oil & service resets/ battery registration and reset
- Reset Steering Angle Sensor (SAS)
- Set inspection 1 and 2 service intervals
- View and graph live freeze frame data
- Performs O2 monitor, on-board monitor, I/M readiness and component testing

Vehicle Diagnostic Tool

- Read/clear codes for all module systems such as powertrain, body chassis and communication
- Supports all 10 OBDII test modes- freeze frame, enhanced mode 6, I/M readiness, vehicle information and component tests
- Open and close EPB pads for service
- Diagnose EPB/SBC Caliper functionality

TPMS Service Functions

- Wireless OBDII connection to read and clear codes
- Detects and displays TPMS system faults
- Activates and relearns all known sensors
- Reads tire pressure, sensor ID information and battery level of sensor
- On-tool relearn procedure; widest OBD relearn coverage
- Displays relearn procedures
- Tire pressure placard value change
- Programs the AUTEL[®] MX sensor
 - » Copy by activation
 - » Copy by manual input
 - » Auto create 1-16 sensors
 - » Copy by OBDII

Internet ready wireless tablet with large, easy-to-read 7 inch touch screen display

Rechargeable lithium battery for 7 hour continuous battery life

THREE Tools in ONE

Advanced Service
All System Diagnostics
Complete TPMS

Wireless OBDII Connection via Mini VCI

- Transmit vehicle data to the tablet without a physical connection
- Enhanced wireless bluetooth connectivity between the tablet and VCI device allows greater service mobility and easier TPMS sensor interaction while the tablet is still connected to the vehicle for data transmission.

Myers # 21603

Includes: TS608 Unit, Bluetooth Cordless OBDII, Charging Cord, Carry Case, User Manual, 1 year warranty, 1 year software updates
